Thank you, Emily,

Please note that PWS permit will be addressed by NWRO SDW program, based on your submission (e.g. New VFD?).

Here are my preliminary research based on your submission.

- WWTP : Please contact Erie CCD about Chapter 102. It would not be a permit but E&S or stormwater plan would be clarified.
- Freeport Pump Station: This is located in FEMA studied Floodplain Zone AE. Could you search the Authority's existing Chapter 106 permit (or 105)? It would be constructed after 1993 before 2005, so an existing permit would be considered. Or if you have old FEMA map which showed the pump station was out of it at that time, you can also provide it in lieu of the permit.
- Route 20 Pump Station – if any activities are within the building, no concern would be for Chapter 102 and 105 at this pump station.
  
- All pipelines – As talked, please contact Erie CCD if they are not reviewing E&S plan between 5,000 sq ft and 1 ac. According to PA 25 § 102.4, a written E&S plan(s) is required.
- Hutchinson Drive 2,000 lf waterline – Some of concerns are found in PHMC website. Please clarify.
- Clay Street 2,500 lf waterline – This is located in FEMA floodway, FEMA studied floodplain zone AE, NWI riverine, and stream (T62265 to Sixteenmile Creek). There would be also a permitted enclosure where your pipeline is proposed to be constructed. Therefore, please contact NWRO WW program with the detailed plan and cross section to get the clarification.
- Clinton Street 1,800 lf & Wall Street 800 lf waterline – PHMC eligible above ground building and another concerns are found in PHMC website. Therefore, it should be clarified. In addition, please explain what is “service reconnections” (how long of service reconnections? Is there existing line or new line for service reconnection?)
  
- Please provide PNDI for all project areas if available.

Sincerely,

*Tae-Uk Kim, Ph.D., P.E.*

**Subject:** RE: North East Borough Water Authority (Erie County) PENNVEST Planning Consultation - Drinking Water

All,

Thank you for your time Tuesday morning to discuss your proposed PENNVEST project.

As a follow-up, please continue to work with my DEP colleagues to address any permit-related matters. Your project has already been started in the PENNVEST portal with ID number 251154152308-CW.

As for the second “phase” or portion of work which requires additional permits, we may have to meet again for a quick 15 minute call once you are closer to submitting that specific application. Otherwise, the meeting Tuesday morning will serve as the planning consultation for both projects.

Dr. Kim or Andrew Gaul will reply shortly with meeting notes and any other DEP-specific items.

Thanks again for your interest in PENNVEST. We look forward to working with you and the Authority on its upcoming projects.

Regards,

Brendan
